Exercise 1

(a)

Question 1 Example with \maketitle only

$$\int_{-\infty}^{\infty} e^{-r^2} dr = \sqrt{\pi}$$

Definition 1 (Example DFN). This is an example definition using thm.

Theorem 2 (Example Thm). *This is an example thm using thm.*

$$\text{NP} \subset \text{P/poly} \implies \text{PH} = \Sigma_2^P$$

Proof. Trivial. (not really)

□

We are at git commit ba07920+.

This is a URL: <https://www.example.com>. See Theorem 2 for an example theorem, and [1] for an example citation.

Exercise 2

(b) Example with \maketitle and \makegrouproster.

$$\int_{-\infty}^{\infty} e^{-r^2} dr = \sqrt{\pi}$$

Definition 3 (Example DFN). This is an example definition using thm.

Theorem 4 (Example Thm). *This is an example thm using thm.*

$$\text{NP} \subset \text{P}/_{\text{poly}} \implies \text{PH} = \Sigma_2^p$$

Proof. Trivial. (not really) □

- ◆ This is an example itemize list.
- ◆ It uses the enumitem package, which is loaded by default.
 - ▶ This is a nested itemize list.
 - ▶ Look at the nice labels
 - This is a nested nested itemize list.

We are at git commit ba07920+.

This is a URL: <https://www.example.com>. See Theorem 6 for an example theorem, and [1] for an example citation.

Exercise 3

(c) Example page without title and roster.

$$\int_{-\infty}^{\infty} e^{-r^2} dr = \sqrt{\pi}$$

Definition 5 (Example DFN). This is an example definition using thm.

Theorem 6 (Example Thm). *This is an example thm using thm.*

$$\text{NP} \subset \text{P}/_{\text{poly}} \implies \text{PH} = \Sigma_2^p$$

Proof. Trivial. (not really)

□

- ◆ This is an example itemize list.
- ◆ It uses the enumitem package, which is loaded by default.
 - ▶ This is a nested itemize list.
